León 2012
Joint Meeting of

30th Meeting of the European Society of Veterinary Pathology
Annual Meeting of the European College of Veterinary Pathologists
24th Annual Meeting of the Spanish Society of Veterinary Pathology

León (Spain) September 5th to 8th of 2012
León 2012 Joint Meeting

of

30th Meeting of the European Society of Veterinary Pathology,
Annual Meeting of the European College of Veterinary Pathologist
24th Annual Meeting of the Spanish Society of Veterinary Pathology

This meeting is dedicated to honour

Prof. Franco Guarda

León (Spain) September 5th to 8th 2012
ESVP Council
Roderick Else (President), University of Edinburgh (United Kingdom)
Sanja Aleksic-Kovacevic, University of Belgrade (Serbia)
Cinzia Benazzi, University of Bologna (Italy)
Felix Ehrensperger, University of Zürich (Switzerland)
Juan Francisco García Marín, University of León (Spain)
Carl Härd af Segerstad, National Veterinary Institute, Uppsala (Sweden)
Jacob Walter, Bayer Schering Pharma AG, Berlin (Germany)

ECVP Council
Mona Aleksandersen, (President), University of Oslo, (Norway)
Chiara Brachelente, Perugia (Italy)
Sean Callanan, University of Dublin (Ireland)
Flavio Crameri, Basel (Switzerland)
Anja Kipar, University of Liverpool (UK) and University of Helsinki (Finland)
Xavier Palazzi, Alfortville (France)
Laura Peña, University of Madrid (Spain)
Gabriele Pohlmeyer-Esch, Saint Louis (France)
Paola Roccabianca, University of Milan (Italy)

SEAVP Council
Aniceto Mendoza Sanchez (President), University of Cordoba (Spain)
Juan Manuel Corpa Arenas, Universidad CEU- Cardenal Herrera, Valencia (Spain)
Antonio Espinosa de los Monteros y Zayas University of Las Palmas (Spain)
José Pérez Arévalo, University of Cordoba (Spain)
Rosa María Rabanal Prados, Universitat Autònoma de Barcelona (Spain)
Juan Seva Alcaraz, University of Murcia (Spain)

ESVP / ECVP Scientific Committee
Lluis Lujan Lerma, (Chairperson), University of Zaragoza (Spain)
Sean Callanan, University of Dublin (Ireland)
Roderick Else, University of Edinburgh (United Kingdom)
Juan Francisco García Marín, University of León (Spain)
Carl Härd af Segerstad, National Veterinary Institute, Uppsala (Sweden)
Ken Smith, University of London (United Kingdom)
Federico Valenza, University of Torino (Italy)

Local Organizing Committee
Juan Francisco García Marín (Chairperson), University of León.
Julio Benavides Silvan, Animals Research Institute. CSIC. León.
María del Carmen Ferreras Estrada, University of León.
María José García Iglesias, University of León.
Jorge González Fernández, Micros Veterinaria. León.
Beatriz Martínez Fernández, University of León.
Claudia Pérez Martínez, University of León.
Valentín Pérez Pérez, University of León.
Laura Polledo Ruiz, University of León.

Introduction: Diabetic nephropathy is a microvascular complication of diabetes progressing to end-stage renal disease. Thus, ability of antidiabetic drugs to ameliorate renal disease is as important as their capability to control glucose. Whereas the hypoglycemic effects of sitagliptin, an incretin-dipeptidyl peptidase-IV (DPP-4) inhibitor, are well known, its renal effects remain to be elucidated. This study aimed to evaluate the effects of 6-weeks treatment with a low dose of sitagliptin in diabetic nephropathy in the ZDF rat, animal model of Type 2 Diabetes.

Materials and Methods: Diabetic ZDF male rats (20-weeks-old) were treated with vehicle/sitagliptin-10 mg/kgBW/day, during 6 weeks (n=8 each). Kidney specimens were stained with haematoxylin-eosin and periodic-acid-Schiff and examined by light microscopy. Semiquantitative rating was assigned to each component, ranging from 0-absent to 3-severe and extensive damage. Damage was assessed by evaluating glomerular and tubulointerstitial lesions (interstitial fibrosis/tubular atrophy – IFTA) and vascular lesions.

Results: Renal lesions in ZDF rats were linked with mesangial expansion and extensive sclerosis. Sitagliptin prevented aggravation of glomerular and vascular lesions, as well as IFTA, in diabetic ZDF rats.

Conclusion: Results suggest that sitagliptin could provide additional therapeutic benefits against diabetes-associated nephropathy.
