Notices

Knowledge and best practice in this field are constantly changing. As new research and experience broaden our understanding, changes in research methods, professional practices, or medical treatment may become necessary.

Practitioners and researchers must always rely on their own experience and knowledge in evaluating and using any information, methods, compounds, or experiments described herein. In using such information or methods they should be mindful of their own safety and the safety of others, including parties for whom they have a professional responsibility.

To the fullest extent of the law, neither the Publisher nor the authors, contributors, or editors, assume any liability for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions, or ideas contained in the material herein.

Contents

List of Contributors

Prologue

1. Grape Maturity and Selection: Automatic Grape Selection

SUSANA RÍO SEGADE, SIMONE GIACOSA, VINCENZO GERBI AND LUCA ROLLE

- 1.1 Physicochemical Characteristics of Enological Interest
 - 1.2 Vineyard Approaches to Grape Selection and Harvest Date Determination
 - 1.3 Grape Selection in Winery
- References

2. Acidification and pH Control in Red Wines

PIERGIORGIO COMUZZO AND FRANCO BATTISTUTTA

- 2.1 Importance of Acidic Fraction and pH Control in Red Wines
 - 2.2 Main Organic Acids in Must and Wine
 - 2.3 Total Acidity and Wine pH
 - 2.4 Acid–Base Equilibrium and Wine Buffer Capacity
 - 2.5 Traditional Strategies for Chemical Acidification
 - 2.6 Traditional Strategies for Chemical Deacidification
 - 2.7 New Technologies for pH Control
 - 2.8 Laboratory Techniques for Measuring pH and Acidic Fraction
- Acknowledgments
References

3. Maceration and Fermentation: New Technologies to Increase Extraction

ANTONIO MORATA, CARMEN GONZÁLEZ, WENDU TESFAYE, IRIS LOIRA AND JOSE A. SUÁREZ-LEPE

- 3.1 Introduction
 - 3.2 Tank Design for Red Winemaking
 - 3.3 Vessel Materials in Red Winemaking
 - 3.4 Kinetics of Extraction: The Effect of Temperature
 - 3.5 Mechanical Processes During Maceration
 - 3.6 New Extraction Technologies
 - 3.7 Conclusions
- References

ix	4. Use of Non-<i>Saccharomyces</i> Yeasts in Red Winemaking	51
xi	MAURIZIO CIANI AND FRANCESCA COMITINI	
	4.1 Introduction	51
	4.2 Yeast Ecology of Grape Berry	51
1	4.3 Controlled Fermentation: The Role of <i>Saccharomyces Cerevisiae</i>	55
	4.4 Non- <i>Saccharomyces</i> Yeasts Features in Red Wine	56
	References	64
	5. Yeast Biotechnology for Red Winemaking	69
	KARINA MEDINA, VALENTINA MARTIN, EDUARDO BOIDO AND FRANCISCO CARRAU	
	5.1 Introduction	69
	5.2 Yeast Diversity in Red Grapes and Musts	70
	5.3 Influence of Red Wine Technology on <i>Saccharomyces</i> Strains	71
	5.4 <i>Saccharomyces Cerevisiae</i> and Flavor Compounds	74
	5.5 Practical Red Winemaking and Yeast Performance	76
	Acknowledgments	80
	References	80
	Further Reading	83
17	6. Malolactic Fermentation	85
	IRENE GIL-SÁNCHEZ, BEGOÑA BARTOLOMÉ SUÁLDEA AND M. VICTORIA MORENO-ARRIBAS	
	6.1 Introduction	85
	6.2 Lactic Acid Bacteria in Winemaking	85
	6.3 Factors Impacting LAB at Winery	87
	6.4 Technological Strategies for Managing the MLF Performance	88
	6.5 Impact of MLF on Wine Organoleptic Properties	89
	6.6 Production of Off-Flavors by Lactic Acid Bacteria	91
	6.7 Implications of LAB and MLF in Wine Safety	93
	6.8 Conclusion	94
	Acknowledgments	95
	References	95
	7. Yeast-Bacteria Coinoculation	99
	ISABEL PARDO AND SERGI FERRER	
	7.1 Introduction	99
	7.2 Objectives	101
	7.3 Interactions Between Wine Microorganisms	107

Acknowledgments	108	10.6 When and How Use Them	153
References	108	10.7 Effect of Adding Oak Chips on Wine Characteristics	153
		10.8 Comparing the Effect of Chips or MOX With Aging Wine in Barrels	155
		10.9 The Combined Used of MOX + Chips	156
8. Molecular Tools to Analyze Microbial Populations in Red Wines	115	10.10 Innovations in MOX and Chips Application	157
KAROLA BÖHME, JORGE BARROS-VELÁZQUEZ AND PILAR CALO-MATA		References	159
		Further Reading	162
8.1 Introduction	115		
8.2 Classical and Phenotypic Methods	116	11. New Trends in Aging on Lees	163
8.3 DNA-Based Methods	116	ANTONIO MORATA, FELIPE PALOMERO, IRIS LOIRA AND JOSE A. SUÁREZ-LEPE	
8.4 Matrix-Assisted Laser Desorption/Ionization—Time of Flight Mass Spectrometry	119	11.1 Introduction	163
8.5 Microbial Diversity Assessment Through Enzymes Detection	119	11.2 Use of Non- <i>Saccharomyces</i> Yeasts	166
8.6 Culture-Dependent Versus Culture-Independent Methods	119	11.3 Accelerated Aging on Lees	167
8.7 Conclusions	120	11.4 Lees Aromatization	171
References	120	11.5 Conclusions	174
Further Reading	123	References	174
		Further Reading	176
9. Barrel Aging; Types of Wood	125	12. Evolution of Proanthocyanidins During Grape Maturation, Winemaking, and Aging Process of Red Wines	177
FERNANDO ZAMORA		ANTÓNIO M. JORDÃO AND JORGE M. RICARDO-DA-SILVA	
9.1 Brief Historical Introduction	125	12.1 Proanthocyanidins: Composition, Content, and Evolution During Grape Maturation	177
9.2 The Main Tree Species Used in Cooperage	125	12.2 Evolution of Proanthocyanidins During Fermentative Maceration of Red Wines	183
9.3 The Main Forests Providing Wood For Cooperage	126	12.3 Changes on Proanthocyanidins During Red Wine Aging in Contact with Wood	185
9.4 The Concept of Wood Grain in Cooperage	126	12.4 Final Remarks	189
9.5 Obtaining the Staves: Hand Splitting and Sawing	127	References	189
9.6 Drying Systems: Natural Seasoning and Artificial Drying	129		
9.7 Assembly and Toasting of the Barrel	129	13. Wine Color Evolution and Stability	195
9.8 Types of Barrels and Barrel Parts	130	MARÍA TERESA ESCRIBANO-BAILÓN, JULIÁN C. RIVAS-GONZALO AND IGNACIO GARCÍA-ESTÉVEZ	
9.9 What Happens to a Wine During Barrel Aging	131	13.1 Introduction	195
9.10 Volatile Substances Released by Oak Wood During Barrel Aging	132	13.2 Anthocyanin Stability	195
9.11 Phenolic Compounds Released by Oak Wood During Barrel Aging	134	13.3 Copigmentation	198
9.12 Oxygen Permeability of Oak Wood	136	13.4 Red Wine Color Evolution	199
9.13 Influence of Wood Grain	136	13.5 Winemaking Practices for Stabilizing Red Wine Color	201
9.14 Influence of Botanical and Geographic Origin	137	Acknowledgments	202
9.15 Influence of Natural Seasoning and Artificial Drying	138	References	203
9.16 Influence of Toasting Level	139	Further Reading	205
9.17 Influence of the Repeated Use of Barrels	141		
9.18 Barrel Aging Process	143	14. Polymeric Pigments in Red Wines	207
Acknowledgments	144	JOANA OLIVEIRA, VICTOR DE FREITAS AND NUNO MATEUS	
References	144	Abbreviations	207
Further Reading	147	14.1 Introduction	207
		14.2 Polymeric Pigments in Red Wines	209
10. Emerging Technologies for Aging Wines: Use of Chips and Micro-Oxygenation	149	14.3 Analysis of Polymeric Pigments	212
ENCARNA GÓMEZ-PLAZA AND ANA B. BAUTISTA-ORTÍN		14.4 Stability in Solution and Influence in Red Wine Color	213
10.1 Why Aging Wines in Barrels?	149	14.5 Conclusion	215
10.2 The Micro-Oxygenation Technique	150	References	215
10.3 Positive Factors of Using Micro-Oxygenation	151		
10.4 The Application of the MOX Technique	152		
10.5 The Use of Oak Chips	153		

15. Spoilage Yeasts in Red Wines	219	20.2 Analytes and an Analytical Classification	284
MANUEL MALFEITO-FERREIRA		20.3 The Analysis of "Easy" Aroma Compounds	285
15.1 Introduction	219	20.4 The Specific Analysis of Volatile Phenols	290
15.2 Description of the Main Yeast Genera/Species Involved in Wine Spoilage	224	20.5 The Analysis of "Difficult" Aroma Compounds in Red Wine	291
15.3 Yeast Monitoring	227	20.6 Final Considerations	300
15.4 Control of Yeast Populations in Wines	230	References	301
15.5 Future Trends	233		
References	233	21. SO ₂ in Wines: Rational Use and Possible Alternatives	309
16. Red Wine Clarification and Stabilization	237	SIMONE GIACOSA, SUSANA RÍO SEGADE, ENZO CAGNASSO, ALBERTO CAUDANA, LUCA ROLLE AND VINCENZO GERBI	
AUDE VERNHET		21.1 Sulfur Dioxide: Use in the Winemaking Process and Legal Limits	309
16.1 Colloids and Colloidal Instabilities in Red Wines	237	21.2 Different Forms to Use SO ₂	311
16.2 Wine Clarification	240	21.3 SO ₂ Action Mechanisms	314
16.3 Stabilization With Regards to the Crystallization of Tartaric Salts	245	21.4 SO ₂ Replacement Products for Red Wine Production	318
16.4 Microbiological Stabilization	248	References	320
16.5 Conclusion	249		
References	249	22. Red Wine Bottling and Packaging	323
17. Sensory Analysis of Red Wines for Winemaking Purposes	253	MARK STROBL	
PABLO OSSORIO AND PEDRO BALLESTEROS TORRES		22.1 Glass Bottles	323
17.1 Tasting of Grapes	253	22.2 Targets Today	323
17.2 Tasting in the Production of Red Wine	255	22.3 Bottling Lines	324
17.3 Tasting During Malolactic Fermentation	256	22.4 Hazards in Bottling Red Wine	325
17.4 Conclusions	256	22.5 Closures	333
18. Management of Astringency in Red Wines	257	22.6 Preparing the Wine for Market	334
ALVARO PEÑA-NEIRA		22.7 Packaging	336
18.1 Introduction	257	22.8 Economy	337
18.2 Astringency in Wines	258	22.9 Ecology	338
18.3 Influence of Winemaking Technology in Wine Astringency	261	References	338
18.4 Future Outlook	267	Further Reading	339
References	267		
Further Reading	272	23. Red Winemaking in Cool Climates	341
19. Aromatic Compounds in Red Varieties	273	BELINDA KEMP, KARINE PEDNEAULT, GARY PICKERING, KEVIN USHER AND JAMES WILLWERTH	
DORIS RAUHUT AND FLORIAN KIENE		23.1 Introduction	341
19.1 Introduction	273	23.2 Cool Climate Grape Varieties in the Northern and Southern Hemisphere	342
19.2 Selection of Aromatic Compounds With Distinct Impact	273	23.3 Chemical Composition of Grapes in Cool and Warm Climates	342
19.3 Conclusion	279	23.4 Innovations in Cool Climate Winemaking	347
References	279	23.5 Making Wine From Red Interspecific Hybrid and Fungus-Resistant Varieties	349
		23.6 Yeast Assimilable Nitrogen	350
		23.7 Tannins and Anthocyanin	350
		References	353
20. The Instrumental Analysis of Aroma-Active Compounds for Explaining the Flavor of Red Wines	283	24. Red Winemaking in Cold Regions With Short Maturity Periods	357
LAURA CULLERÉ, RICARDO LÓPEZ AND VICENTE FERREIRA		MA TENGZHEN, KAI CHEN, HAO YAN, HAN SHUNYU AND BI YANG	
20.1 Introduction	283	24.1 Introduction	357

24.2 Wintering Adaptability and Cold Resistance of Grape Vine	363	24.8 Winemaking Technology	367
24.3 Influence of Low Temperature on Different Tissues of Grape Vine	364	24.9 Final Comments	370
24.4 Influence of Low Temperature on Grape Cells	364	References	370
24.5 The Reasons for Freeze Damage	365	Further Reading	372
24.6 Maturity Analysis	365	Author Index	373
24.7 Anthocyanin Accumulation by Viticulture Process	366	Subject Index	383
